No choice — action is always forward

	$d \to d$	f		$d \to d$	f
	$d \to d$	f		$d \to d$	f
	$d \to d$	f		$d \to d$	f
	$d \to d$	f		$d \to d$	f
	$d \to d$	f		$d \to d^l$	f
	$d \to d^l$	f		$d \to d^r$	f
	$d \to d^l$	f		$d \to d^r$	f

Two choices — action always corresponds to resulting direction

	$d \to d^r$ $d \to d^l$	r l		$d \to d$ $d \to d^r$	f r
	$d \to d$ $d \to d^l$	f l		$d \to d$ $d \to d^r$	f r
	$d \to d$ $d \to d^l$	f l		$d \to d$ $d \to d^r$	f r
	$d \to d$ $d \to d^l$	f l		$d \to d$ $d \to d^r$	f r
